

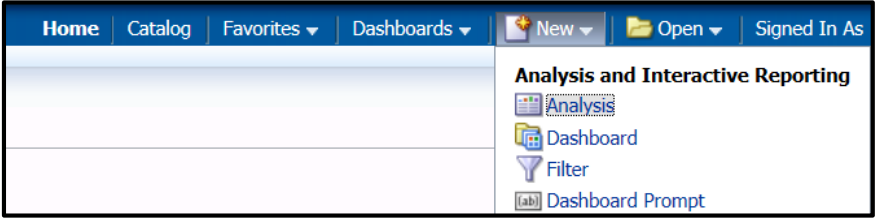

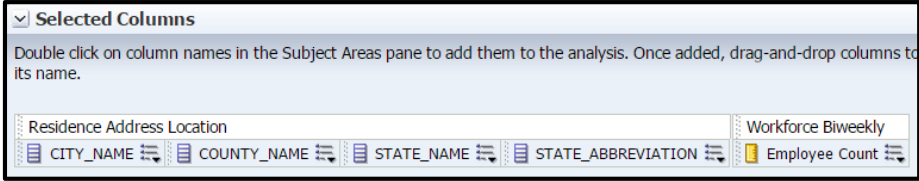

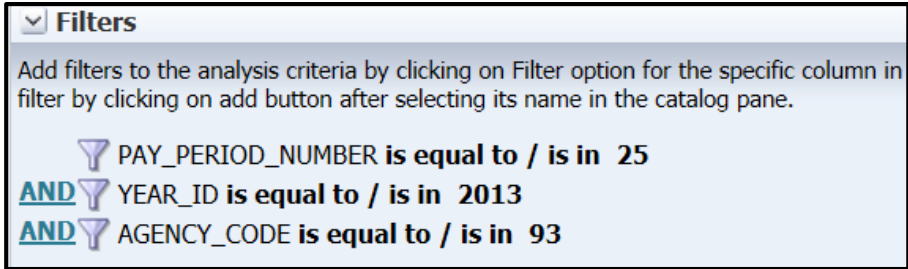

Map Viewer

Please reference the instructions below for instructions to use the map viewer functionality in *Insight*. These steps are based on a Workforce Profile ad hoc report, but these instructions can be applied to reports with user-specified data.

Note: The Map Viewer functionality is only available for the Workforce Profile subject area. Map views can be added to reports that include data elements from the Residence Address Location and Duty Station Location folders.

The Map Viewer can be used to depict data in a variety of scenarios, for example, a map can be used to identify the number of employees in a given geographical area after a natural disaster.

Step	Action
1.	Click the New action link in the top navigation bar.
2.	Select Analysis from the menu of options. <div data-bbox="448 1066 1317 1283" style="text-align: center; border: 1px solid black; padding: 5px; margin: 10px 0;">  </div> <p style="text-align: center;"><i>Figure 1: New Action Link Menu of Options</i></p>
