

On March 27, 2010 changes were implemented in the CPAIS application to include processing with the Financial Management Modernization Initiative (FMMI) system.

The following list is a high-level summary of the user changes implemented in this release:

1. Added the 6 FMMI accounting fields (Business Area, Fund, Budget Period, Cost Center, WBS, and Functional Area) to forms and reports.
2. Modified field labels to reflect both Financial Systems (FFIS/FMMI) connected with CPAIS.
3. Modified form and report processing logic to include functionality with the FMMI system using the FMMI specific fields as well as the current logic accessing FFIS.
