

## FMS ACRWS System Release Results February 19, 2021

### 1.2 Enhancements

All CRs were implemented successfully unless otherwise noted.

| Enhancement | Description                                                                                                                                                        | Agency | Release Results |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|-----------------|
| ENHC0010410 | Modify the IPAC import process to create two records in the ACRWS system, one each for Originating ALC and Customer ALC in order to reconcile each ALC separately. | FMS    | 02/19/2021      |
| ENHC0010512 | Add a catch exception to prevent the "ACRWS failed FMFI files" error that inserts data into the database per data base transaction.                                | FMS    | 02/19/2021      |

### 1.3. Defects

All CRs were implemented successfully unless otherwise noted.

| Defects | Description                                    | Agency | Release Results |
|---------|------------------------------------------------|--------|-----------------|
|         | There are no defects included in this release. |        |                 |
